Instruction: To determine marital equity, enter information in red-bordered boxes in the table. The numbers in the remaining boxes will calculate automatically.

Type of Property	Value at time of marriage	Current value	Quotient change in value	Encumbrance at time of marriage	Premarital equity	Premarital equity, increased by quotient change in value	Current encumbrance	Marital equity

Example:

Type of Property	Value at time of marriage	Current value	Quotient change in value	Encumbrance at time of marriage	Premarital equity	Premarital equity, increased by quotient change in value	Current encumbrance	Marital equity

<i>Formulas</i>			"Current value" divided by "Value at time of marriage"		"Value at time of marriage" minus "Encumbrance at time of marriage"	"Premarital equity" multiplied by "Quotient change in value"		"Current value" minus "Premarital equity, increased by Quotient change in value" minus "Current encumbrance"
